

CLIENT-RELATIONSHIP-APPOINTMENT-TRACKING-SYSTEM

This project involved developing a client management and appointment tracking system to support operational coordination and customer relationship management for Nye's Lounge. The system was designed to monitor appointment statuses, follow-up requirements, customer communication, and service coordination activities.

The spreadsheet-based workflow enabled organized client tracking, operational visibility, and efficient management of customer appointments and aftercare follow-up processes.

Tools Used

- Google Sheets
- Google Workspace
- Data Validation Dropdowns
- Conditional Formatting

Key Tasks Performed

- Tracked client appointments and booking status
- Managed follow-up actions and reminders
- Organized customer service records
- Created operational workflow tracking columns
- Implemented status categorization systems

Findings

- Structured tracking improves operational organization
- Follow-up management enhances customer retention
- Appointment visibility supports workflow efficiency
- Categorized statuses simplify operational monitoring

Recommendations

- Integrate automated reminder systems
- Add customer satisfaction tracking metrics
- Implement centralized CRM functionality
